

Digital education presents an opportunity to transform learning at scale, reduce gaps, and meet the needs of previously underserved learners

2020 is a year characterized by disruption. It has forced expansive adoption of digital learning and highlighted what works—and what doesn't.

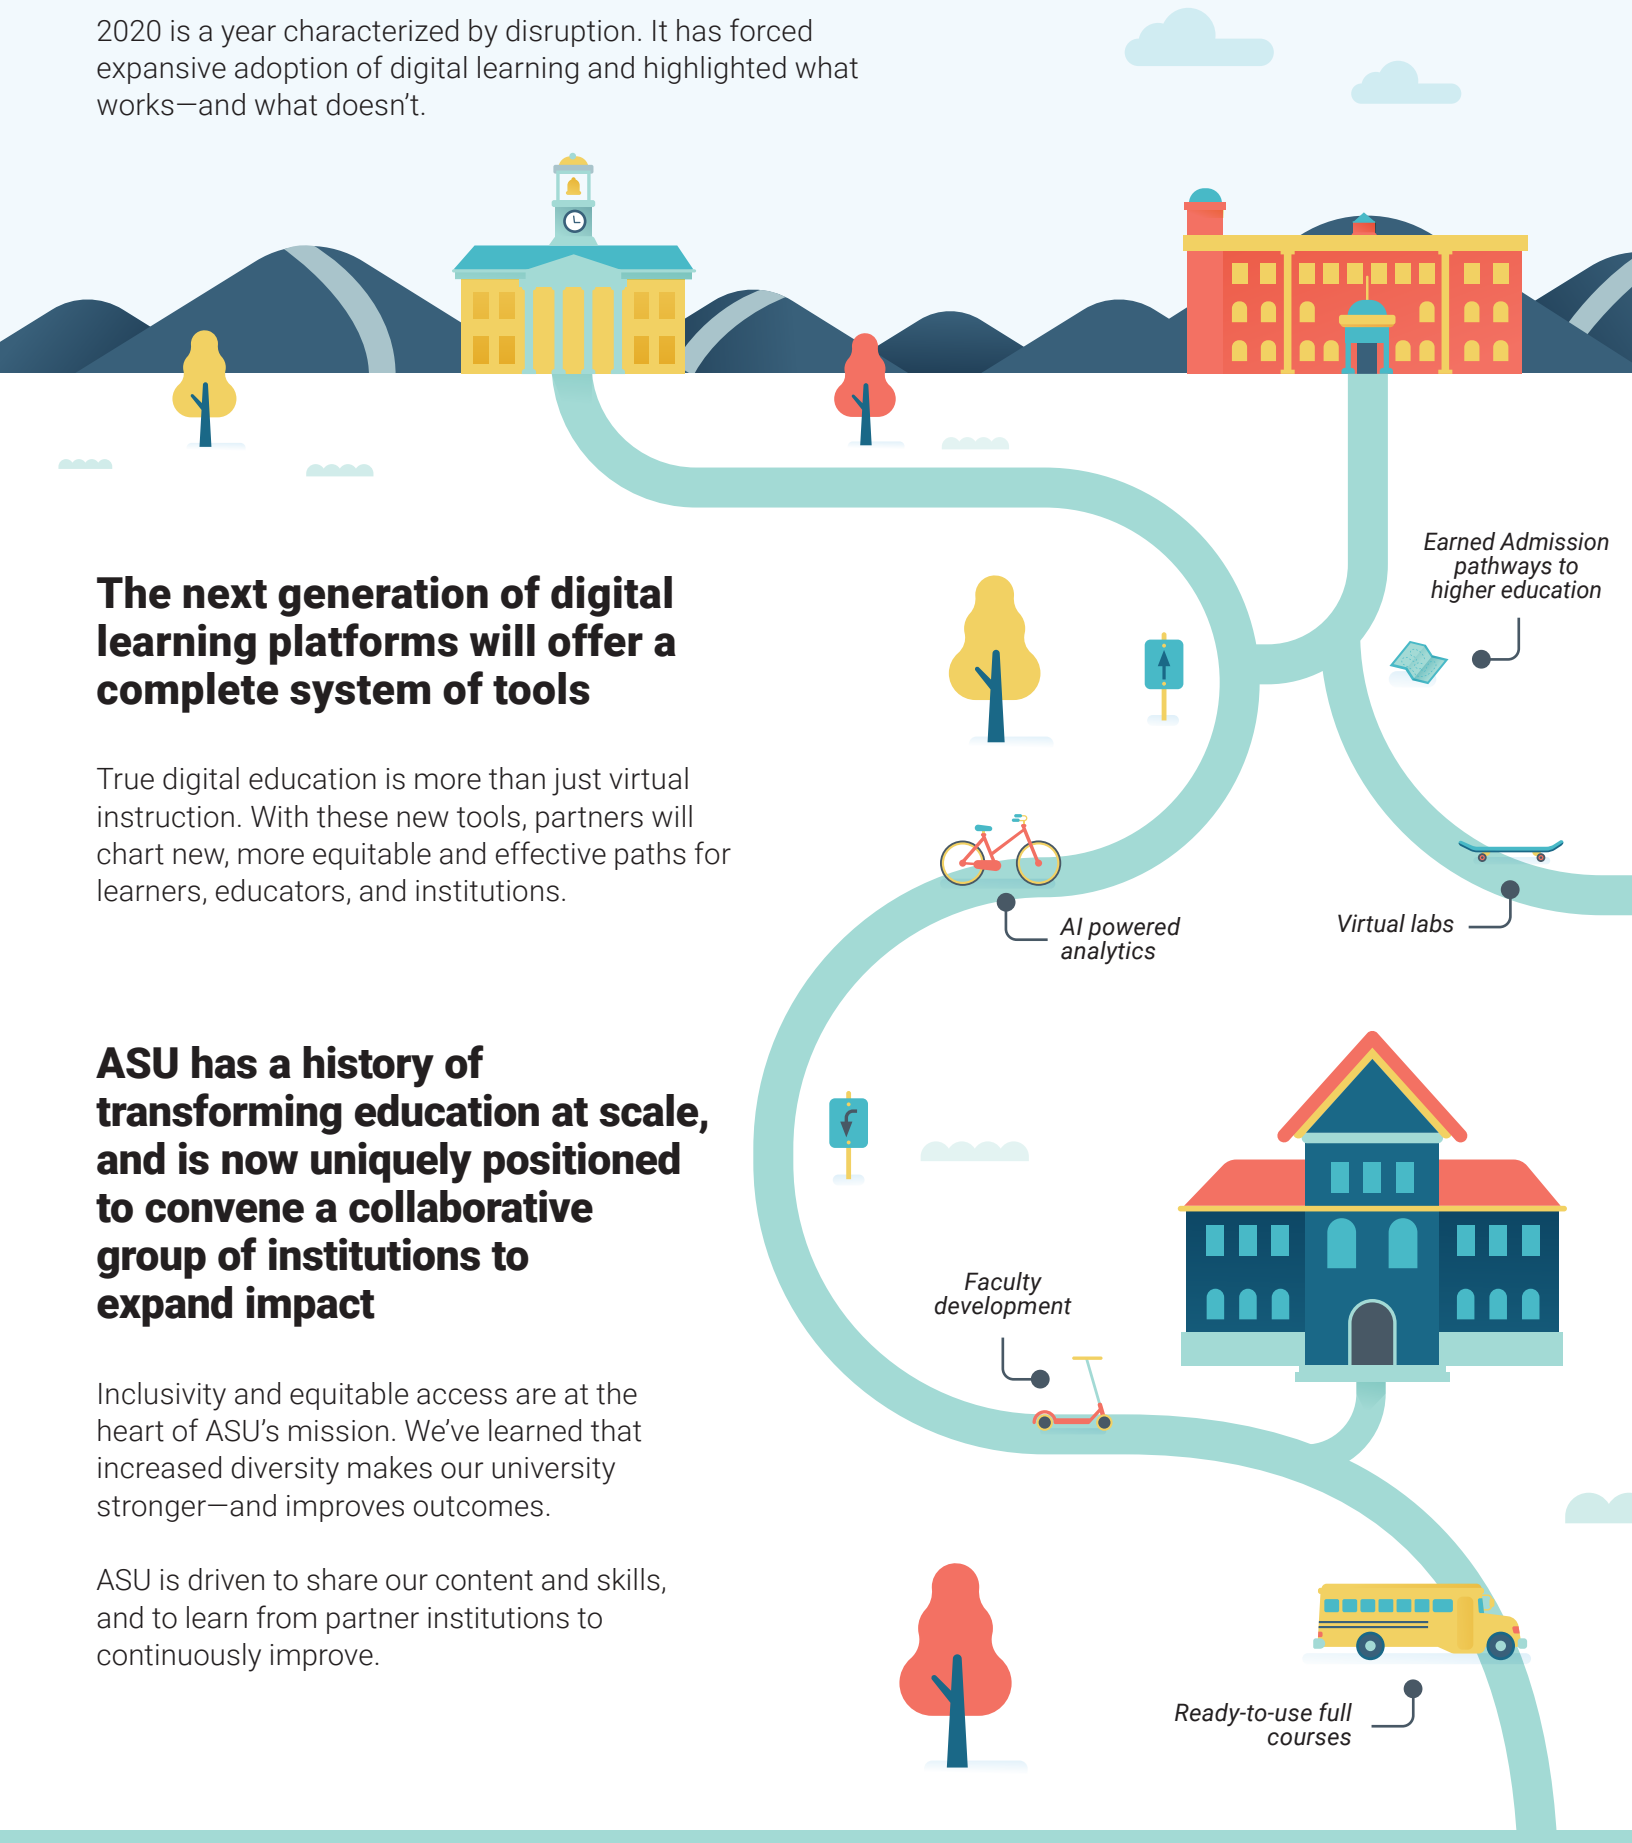

The next generation of digital learning platforms will offer a complete system of tools

True digital education is more than just virtual instruction. With these new tools, partners will chart new, more equitable and effective paths for learners, educators, and institutions.

ASU has a history of transforming education at scale, and is now uniquely positioned to convene a collaborative group of institutions to expand impact

Inclusivity and equitable access are at the heart of ASU's mission. We've learned that increased diversity makes our university stronger—and improves outcomes.

ASU is driven to share our content and skills, and to learn from partner institutions to continuously improve.

Earned Admission pathways to higher education

AI powered analytics

Virtual labs

Faculty development

Ready-to-use full courses

Powered By, launched by ASU in 2020, offers solutions that are ready for implementation today

Support services built with educators in mind

Institutional support to transition smoothly and accelerate the digital journey, and faculty communities to hone expertise.

High quality tools and technology

Immersive learning experiences, virtual simulations, and adaptive feedback—all backed by customizable, open source technology.

Easy-to-use, collaborative catalog

Course and module browsing, review, and fast delivery through an easy-to-use platform supported by a collaborative community.

PoweredBy is designed with a range of needs in mind:

For administrators

- Expertise and scalable technology solutions to support institutional transformation.
- Instructional designers to contextualize course content specific to your institution.
- Evidence-based digital learning pathways proven to increase access.

For learners

- Improved outcomes through proven active learning pedagogy.
- Adaptive learning technology that delivers the content that students need when it's needed.
- Solutions that fit the needs of underserved learners and expand access to higher education.

For educators

- Tools that go beyond virtual instruction and give educators more time for meaningful interactions.
- Courses designed with a focus on academic rigor.
- Intuitive interface for effortless course customization.

Join us in scaling innovation and expanding access to education through collaboration

With your partnership we seek to improve student outcomes at scale, and create networks of institutions and educators to grow this set of tools together .
